

PIXLE NFT
SOCIETY

ABSTRACT

We appreciate your interest in The Pixle NFT Whitepaper. Our team has worked hard to provide the readers with an exhaustive version of our work through intelligible and detailed information on our NFT plans. Pixel NFT combines the excitement of NFTs with the fun of the pixels. People who are used to reading white papers will notice that this one is slightly different. This Whitepaper aims to describe an exclusive lasting club that offers unique pixels.

DISCLAIMER

Pixle NFT does not make or purport to make, and at this moment disclaims any representation, warranty, or undertaking in any form whatsoever to any entity or person, including any representation, warranty, or undertaking concerning the accuracy and completeness of any of the information set out in this Whitepaper. This Whitepaper provides a summary of the unique pixels we have to offer. This Whitepaper may contain references to third-party research, data, and industry publications. No warranty is given to the accuracy and completeness of this third-party information. Neither the third-party information, inferences, or assumptions have been independently verified. Pixle NFT accepts no liability for damages, whether consequential or indirectly, of any kind arising from the use, reference, or reliance on the contents of this Whitepaper.

OVERVIEW

What is NFT?

Primarily known as NFT, "Non-Fungible Token" is a unique non-fungible asset that cannot be split. NFT can be connected to real-world objects. NFT provides the owner of the native digital assets (assets only exist in or originate from the digital world) with proof of ownership, which can live outside of a centralized server or repository. In Economics, fungible assets refer to currencies, stocks, bonds, and precious metals. Fungible assets are divisible and interchangeable.

What Does Pixel Mean?

The pixel is the basic unit of a digital picture or graphic that may be displayed and represented on a digital display device.

In computer graphics, a pixel is the most basic logical unit. Pixels are used to create an image, video, text, or any other visible object on a computer screen.

A picture element (pix = picture, el = element) is another name for a pixel.

PIXLE NFT

The Pixle NFT project initiative began in late October 2021, intending to create an exclusive lasting club that our holder can be a part of. Our society is made up of eight employees with over 100 members. As a society, we will offer various kinds of utility to our members that will be sold on open sea on January 17, 2022.

GLOSSARY

NFT Society: Anyone who holds one or more Pixle NFTs are granted access to the benefits of the club.

Tokenomics: The term "Tokenomics" combines the words "token" and "economy" to describe the structure that determines the internal economy of blockchains and their interaction with the outside world. The exchange value of crypto assets is determined by the balance of rewards, penalties, token amount, and token supply schedule.

The name "cryptoeconomics," on the other hand, refers to a subset of tokenomics that deals with incentive problems and emphasizes a mathematical approach to networks. While tokenomics includes tokens and tokenization ecosystems, it does not involve the broader blockchain networks, protocols, and cryptocurrencies.

Staking: Staking in NFT refers to the locking up of NFTs on a platform or protocol to receive staking rewards and other privileges. This allows NFT holders to earn a passive income while still maintaining ownership of their NFTs.

PROJECT ROADMAP

Q4 2021

Whitelist is open for people joining the community early. Whitelisted members will be able to mint early for 0.15 ETH.

Q1 2022

Members will be able to mint their NFT on January 17th.

Q2 2022

If 100% sold, the community event will take place.

Q3 2022

- Our goal is to implement staking, and you will be able to stake your NFT for rewards.
- We want the NFTs to provide real-world utility and access to exclusive events worldwide.
- We want to implement a way to combine several pixels you own as a deflationary measure to control the supply.

Q4 2022

A native token gifted to all holders will be used as a reward for staking your Pixle.

Our plans for the future are ambitious, and those who follow us along for the ride will be rewarded!

MINT ROADMAP

10% sold

Three lucky early holders will win a model 3 tesla.

20% sold

10 000\$ instant prize is given to 11 random holders

40% sold

Exclusive premium branded merch is gifted to 25% of those who own a Pixle NFT at the time of giveaway.

50% sold

5 Rolex given to special NFTs that are fully uniformed

60% sold

All holders are granted access to an exclusive online NFT Society

80% sold

80 000\$ is given to a community chosen charity

100% sold

Private concert with one multi-platinum artists for 2000 random selected via raffle. This first pixle NFT event is aimed to be held in NYC in Q2 of 2022 as long as Covid restrictions can be complied.

All prizes and giveaway winners will be chosen via a neutral, third-party website to ensure complete fairness. The Pixle NFT team will ensure that the giveaway's integrity is upheld and that everybody has the same amount of chance to win. Only holders at the time of the giveaway are entered.

The more Pixle NFTs you have, the more entries! Each pixle equates to one entry. Prizes will be delivered globally, but if someone resides in a country where laws prohibit the reception of the prize, a cash equivalent amount of ethereum will be given to the winner.

Note: Instant cash prizes are also granted in ethereum. We decided upon this as we were adamant about allowing equal opportunity and giving a chance for anybody to join and reap the benefits of the Pixle NFT Society.
